## Keeping Summer Afloat: A Closer Look at Boating Brands in the Greater Daytona Region

With our area's beautiful waterways, perhaps it is no surprise that several of the Greater Daytona Region's largest employers are boat manufacturers. During COVID-19 and beyond, these brands have been hard at work serving their communities and helping us look ahead toward a return of family fun and outdoor adventure.

## Hurricane Season Preparation with FPL

We have restored service to all customers affected by Tropical Storm Isaias. While customers experienced approximately 40,000 outages, preliminary estimates show the company's smart grid technology helped avoid approximately 18,000 outages. The leading cause of outages was vegetation and debris blowing into power lines. We deployed approximately 50 drones to help crews visualize damage in hard to access or flooded areas. The average customer was restored in approximately 85 minutes.

We are now working with other utilities to the north to help reallocate crews that came to assist along with releasing resources to help respond to Isaias as it moves toward the Carolinas. For full details on the restoration effort, please read the current news release below.
